#### History

##### #1 - 04/08/2020 10:38 AM - dandar3

- File *tmdb fix (with gzip compression).zip* added
- File *Fiddler comparison - without and with gzip compression.png* added

While at it, I've updated the fix to include gzip compression.  
<url ... gzip="yes">[http://...&lt;/url>](#)

Should speed up things a bit by reducing the amount of data coming down the wire. Attached a Fiddler screenshot to show the before and after image (700 B -> 400 B, 13 KB -> 4 KB, 7 KB -> 2 KB etc).

##### #2 - 04/15/2020 11:29 AM - dandar3

Feedback from Grupy on the forum thread:

I added a couple of movies and with the GZIP compression file I was able to scan the two movies without any issues. I proceeded to delete all of the files downloaded by TinyMM and my library to so I can scan everything again with this file and it worked great! I was able to scan my Movie Library without any issues.
